About The Alliance

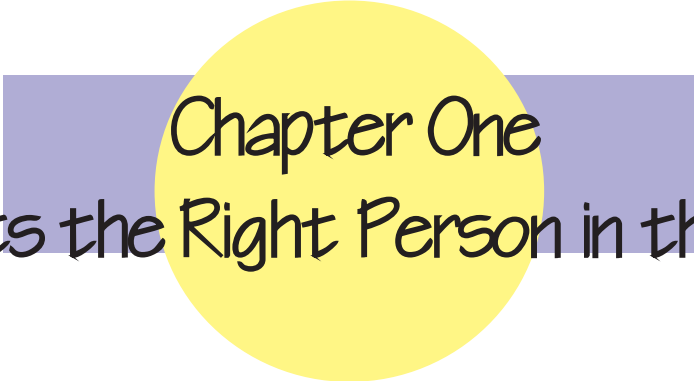

Both nationally and locally, as we began to integrate and employ people with disabilities rather than institutionalizing them, the public focus on coordinating community planning grew. In the mid-1980's, Tulsa-area leaders, including the Metropolitan Human Services Commission (MHSC), State Senator Maxine Horner, the Community Service Council of Greater Tulsa, the Area Health Education Center (AHEC), and the Community Integration Committee (CIG) developed the initiatives that led to the formation of the Tulsa Area Alliance on Disabilities.

Under the umbrella of the Community Service Council, the Alliance (then known as the Tulsa County Community Advisory Board for Persons with Disabilities, or CAB) began meeting in 1990. Initial funding came from the Oklahoma Department of Human Services and the Tulsa Area United Way (TAUW). Additional funding now comes from grants, corporations and contracts. Professional staffing assures continuity and high quality in all Alliance work.

With more than 100 members and technical advisors drawn from government, business, diverse service professionals, supporters, volunteers, advocates and people with disabilities, the Alliance benefits from strong community participation.

Chapter One

Access Puts the Right Person in the Right Job

*A Word from Jim Stovall
Co-Founder & President of the Narrative Television Network*

The first question many people ask upon meeting a new person is, "What do you do?" Millions of people with disabilities are faced with no answer to this question. Even worse, in most situations, people with disabilities are not even asked what they do because the assumption has been made that they are unemployable.

On the contrary! People with disabilities make wonderful employees. They are more conscientious and loyal, and less likely to hop from job to job due to the lack of opportunities existing today.

As a blind person myself, I have become keenly aware of the fact that the greatest barrier to full employment is the lack of expectation in our society. It's not as much that employers openly discriminate against people with disabilities as it is that they don't consider people with disabilities at all.

I would encourage any employer to take advantage of this wonderful, untapped resource that exists. Simply give the disabled workforce a chance, and you will reap many rewards.

Access puts the right person in the right job - Why you should make your fair accessible.

For more than a decade, the Tulsa Area Alliance on Disabilities (the Alliance) along with the Community Service Council of Greater Tulsa (CSC) has provided leadership to bring interested citizens and organizations together to ensure the full participation of people with disabilities in all aspects of life.

The Alliance brings you this guide to help you welcome qualified job candidates with disabilities to your job fair.

This guide will:

- **Enrich your job fair recruitment tools**
- **Expand your job fair marketing expertise**
- **Make it easy to welcome job candidates with disabilities, and**
- **Show simple inexpensive ways to improve access.**

In the new millennium, businesses increasingly see:

- Labor shortages
- Job matches requiring active recruitment, and
- Hiring options expanding when barriers are removed, whether for race, age, gender or disability.

Did You Know?

- More than 20 percent of the U.S. population (54 million Americans) have a disability (U.S. Census, 2000)

How can you make change happen?

Easy ... You can hire!

Employers want employees with strong characteristics, including:

- Integrity
- Skills and knowledge
- Good communication
- Energy, and
- Ambition

Therefore, employers are learning that employees with disabilities:

- Meet recruitment demands
- Bring skill, strong performance records and job loyalty
- Improve hiring outcomes

Not only does bringing people with disabilities into your hiring practices mean you have more employee options, but you will receive benefits beyond your expectations. By increasing disability access and progressive hiring, you may:

- Receive employer tax credits
- Experience higher retention rates and lower turnover
- Improve dependability and loyalty among your workforce

Did You Know?

- 72 percent of working age people with disabilities want to work (National Organization on Disability (NOD), 1999)

Chapter Two

Employment Track Records: Real Benefits of Hiring People with Disabilities

*A word from Senator Max Cleland (D-Ga.), a Vietnam veteran who lost
three limbs in combat
America must do more to release the talents and abilities of our citizens
with disabilities who want to work, participate and contribute to the nation.*

Employment track records: The real benefits of hiring people with disabilities.

Hiring people with disabilities is good business. And you can save taxes too. This section offers a brief guide to benefits received when hiring people with disabilities.

Tax Credit Benefit The Work Opportunity Tax Credit (WOTC) Program

What is the WOTC?

WOTC is a tax credit for employers who hire certain targeted groups, including vocational rehabilitation referrals (people with disabilities), former Temporary Assistance for Needy Families (TANF) recipients, veterans, ex-felons, food stamp recipients, summer youth employees and Supplemental Security Income (SSI) recipients (people with disabilities).

WOTC Web site: www.ssa.gov

What do employers do?

Ensure tax credit certification.

Employees with disabilities are eligible for this credit when:

- They are a vocational rehabilitation (VR) referral and still receiving VR services, and
- Certified by the State Employment Security Agency (SESA)

Department of Labor Employment & Training Administration –
www.wdr.doleta.gov

Department of Rehabilitation Services – www.onenet.net/~drspiowm

What credit does the employer receive?

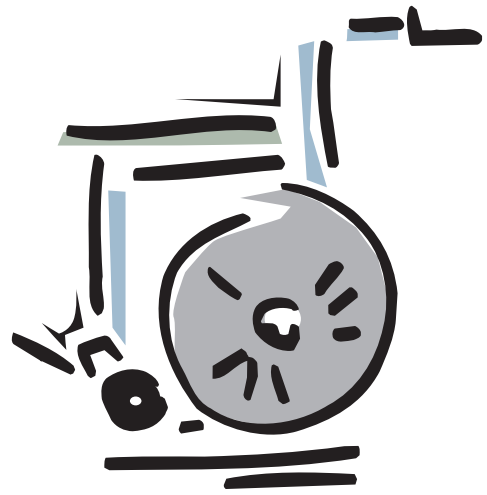

- A tax credit of up to 40 percent of the first \$6,000 paid, or
- A tax credit of up to \$2,400 in wages paid during the first 12 months of each new hire

IRS Form 8850 is required. To order, call (800) 829-3076 or visit www.irs.ustreas.gov/prod/forms_pubs/index.html

Jobs for Persons with Developmental Disabilities

Persons with developmental disabilities are working in diverse workplaces, including but not limited to:

- Library assistants
- Computer operators
- Mail office clerks
- Textile matching tenders
- Carpenters
- Cooks
- Messengers
- Office machine operators
- Engineering aides
- Sales personnel
- Clerical aides
- Nursing aides
- Radio repair helpers
- Photo copy operators
- Printers
- Nursery workers
- Laundry workers
- Animal caretakers
- Meat cutters
- Ambulance attendants
- Housekeepers
- Building maintenance workers
- And many more ...

Ready, Willing and Able

Evidence shows that employees with disabilities ...

- Are not absent any more than those without disabilities,
- Rated average or better in job performance than employees without disabilities,
- Supply their own transportation,
- Are not a considerable expense to accommodate,
- Are not any more likely to have accidents on the job
- Have a strong desire to work
- Are above average in punctuality, attendance and tenure

Chapter Three

How to start ...

Integrating Accessibility into Your Job Fair

-
- *Persons with disabilities comprise 20 percent of the nation's population and are our nation's largest growing minority.*
 - *40 percent of those over 65 will have a disability as the population continues the trend of aging.*

How to Start ...

It's Easy

To integrate people with disabilities into job fairs isn't difficult, and you only need a few more people to assist than a traditional job fair.

Staffing the Job Fair

In addition to the standard greeters, registration attendants and general floaters, you'll need the following volunteers:

- Sign language interpreters
- Sighted guides
- Job fair buddies

Equipping the Job Fair

It's a given that you'll prepare handouts, surveys and signage for your job fair. But don't forget to include a few key information pieces for your attendees who have disabilities, including:

- Braille handouts
- Information in large type
- Signs with Braille and large type

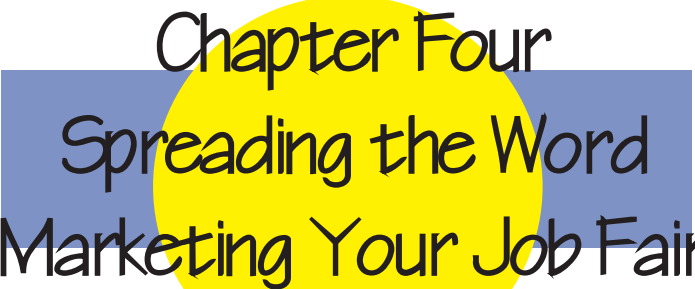

Before the job fair, make sure these questions have been answered:

- Are there transportation services available (Tulsa LIFT) for those who inquire about it prior to the event?
- Are there handicap parking spaces available and nearby?
- Is there a ramp or step-free entrance?
- Is there adequate posted information on direction, booths, times and contacts? Reproducible copies of a few symbols can be found in the resource section in the back of this guide.
- If the job fair is not on the first floor, does the building have an elevator?
- Are the restrooms accessible and are the stalls large enough?
- Are there any telephones and water fountains at the proper height for a person in a wheelchair to use?
- Are the job fair aisles large enough to accompany people with and without disabilities?
- Is a hospitality booth/room available for the job fair volunteers?

Chapter Four

Spreading the Word

Marketing Your Job Fair

*A word from Glen M. Baisley
Project Coordinator for Tulsa Metro Chamber Career Partners, Inc.
(Construction Academy)*

The best thing you can do in advocating for people with disabilities is to first develop relationships with people. The difference in communicating with people about disabilities is in breaking down pre-conceived notions and helping them think in a different way than they're used to.

How to Welcome People with Disabilities

Hosting a job fair that welcomes people with disabilities is easy. You simply need to follow these steps:

- Add accessibility symbols to all job fair marketing materials, such as advertisements, posters, brochures, Web site, etc.
- Announce that the job fair will be accessible in audiovisual materials.
- Use closed captioning on audiovisual materials so those with hearing disabilities will be exposed.
- Put posters and ads in a wide geographical circle of discount/department/convenience stores, government employment offices, clinics, bookstores, apartment complex bulletin boards, technical and vocation schools, area colleges and community service offices.
- Use large, clear type in all marketing materials.

Get the Word Out

Don't forget to send information to the local media for possible coverage and airing of public service announcements (PSAs). Some local outlets in the Tulsa market include:

• Print

Tulsa World
Attn: Business Editor
P.O. Box 1770
Tulsa, OK 74102
(918) 581-8300

The Community World
Attn: Del Schafer
753 W. New Orleans

Tulsa, OK 74101
(918) 445-8888

Cox Communications
8421 East 61st, Ste. U
Tulsa, OK 74133

Television stations run PSAs free of charge and usually require them to be at the station four weeks in advance. Call the stations for information about formatting of tapes. Address tapes to the PSA Director.

• **Radio**

Most radio PSAs must be delivered two weeks in advance. Most stations will play these free of charge as long as they get the announcement before the deadline. Contact the individual stations for assistance with formatting preferences.

Tulsa, OK 74146
(918) 664-4724

Marketing Extras

When advertising for your job fair, it is important to include the necessary symbols that make persons with disabilities aware of their participation in the event. This page includes the symbols that are used for persons with disabilities. You can either cut these out, or scan them into your computer.

Chapter Five

Etiquette Matters

*A Word from Dr. Even Culp
Professor at Oral Roberts University*

A young man walked with a spastic gait down the hall of a large speech rehab center. Turning a corner he encounters a speech therapist. Seeing how he walks, the therapist greets him speaking slowly "H-E-L-L-O, H-O-W A-R-E Y-O-U?" The therapist speaks deliberately assuming the man has a hearing or processing deficit. In reality this person is a researcher working in another part of the building. It was an embarrassing moment caused by a false assumption.

One of the greatest opportunities employees have today is to see people for their abilities and how they can contribute to our company's mission. This requires us to overcome the invisible barriers of ignorance and assumption sometimes found within our midst.

As a person with a disability I have been blessed to have the opportunity to teach and produce television programming for the past 25 years. I am thankful for those who saw my ability and gave me a chance to contribute. I still chuckle when I think back to my encounter with the speech therapist. "Hello, How are you?" I told her, "I was great and on my way to work.."

Etiquette Matters ...

Becoming aware of the differences without making a big deal

When writing or talking about people with disabilities, many employers who have not been exposed to the differences face a great deal of discomfort and hesitation. How can you and your staff learn to understand and appreciate those differences? Follow these simple guidelines:

- Use positive language. It is empowering to you, your staff and people with disabilities.
- When writing or speaking to a person with disabilities, it is important to put the person first.
- Remember that each disability is unique and each person is an individual.
- Treat people with disabilities as you do any other person.
- Ask people with disabilities whether or not they want or need help before assisting.
- Establish eye contact when speaking with people with disabilities.
- Don't talk down to people with disabilities thinking that what is being said cannot be heard or understood.
- If someone has a dog guide, don't pet or feed. Doing so may put the owner's safety in jeopardy.
- If someone looks disoriented, ask if he or she wants a "sighted guide."
- Be aware of objects protruding at a person's head height.

Tips for Interviewing

- Conduct interviews that emphasize abilities, achievements and individual qualities.
- Conduct your interview as you would with anyone: be considerate without being patronizing.
- When interviewing a person with a speech impediment, suppress the urge to complete his or her sentences.
- If it appears a person's disabilities limit the requirements of the job, ask how they would perform the task.
- If an interviewee reads lips, look directly at him or her.
- Speak clearly at a normal pace and don't exaggerate your lip movements or shout.
- Maintain eye contact and be expressive with gestures and body movements. If an interpreter is present, speak to the interviewee, not the interpreter.
- Relax and don't be embarrassed if you happen to accidentally use accepted common expressions, such as "See you later," or "Got to run," that seem to relate to the person's disability.
- If the person does not extend their hand (to shake hands), verbally extend a welcome.
- Do not pretend to understand if you do not. Try rephrasing what you wish to communicate, or ask the person to repeat what you do not understand. Prior to the job fair, hosting a Sensitivity Training session for all job fair staff will help ease discomfort and unfamiliarity. By simply going over some of these tips and educating others on how to address and communicate with persons with disabilities, the job fair will be a success.
- Have a quiet, isolated room in which to conduct interviews with hearing impaired applicants.

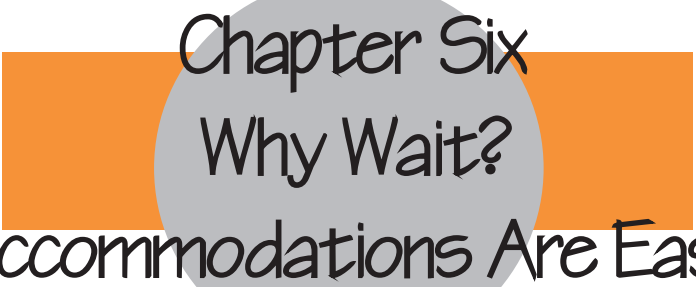

Acceptable Terms & Definitions

- **Disability:** A general term used for functional limitations that interfere with a person's ability. It may refer to a physical, mental or sensory condition.
- **Deafness:** Refers to person who has a total loss of hearing.
- **Hearing impairment:** refers to a person who has a partial loss of hearing, ranging from slight to severe.
- **Hard of hearing:** describes a hearing-impaired person who communicates through speaking and speechreading, and who usually has listening and speaking abilities adequate for ordinary telephone communications. Many hard-of-hearing individuals use a hearing aid.
- **Able-bodies:** able to walk, see, hear, etc. people who have no disabilities.

Unacceptable Terms & Definitions

- **cripple, crippled:** The image conveyed is of a twisted deformed, useless body.
- **Handicap, handicapped person, or handicapped** are still appropriate when referring to a law or office that was set up using the words handicap or handicapped, but not when referring to a person.
- **Never identify people solely by their disability.**
- **Victim of... :** People with disabilities are not victims.
- **Confined / Restricted to a wheelchair, wheelchair bound:** Most people who use a wheelchair or mobility devices do not regard them as confining, but rather as liberating.
- **Healthy or Normal:** When used to contrast with "disabled," these words imply the person with a disability is unhealthy and abnormal.

Chapter Six
Why Wait?
Accommodations Are Easy

*A Word from Tony Coelho
Chairman of the President's Committee on
Employment of People with Disabilities*

As more and more people with disabilities enter the workplace, employers are seeing for themselves and hearing from other how productive they can be. Prejudice crumbles in the face of performance.

Why Wait?

Accommodations are Easy

After hiring qualified people with disabilities to work in your office it may become necessary to make a reasonable accommodation and eliminate any barriers in the workplace that might prevent the most productive work-flow. But don't panic! It's not an expensive or time-consuming effort.

Most workers with disabilities require no special accommodations and the cost for those who do is, on average, minimal or much lower than many employers believe.

• A *reasonable accommodation* is any change or adjustment to a job or work environment that permits a qualified applicant or employee with a disability to participate in the job application process, to perform the essential functions of a job, or to enjoy benefits and privileges of employment equal to those enjoyed by employees without disabilities (*Oklahoma Disability Etiquette Handbook, 1999*).

Consult with each person with a disability prior to the planning and implementation of the accommodation. Usually he or she may know a simple solution.

Examples of Reasonable Accommodations

Table 1

Sight	Sound	Physical
<ul style="list-style-type: none">• Braille and Large Type Reading Materials• Audio Tapes• Large Type Computer Terminals• Braille Printers• Accessible Signage with Raised Type or Braille• Audible Signals in Elevators, Traffic Control Signals, Etc.• Sighted Guides in Difficult to Maneuver Areas• Removal of Head Height Obstacles	<ul style="list-style-type: none">• TDD Phones• Telephone Amplifiers• Qualified Interpreters During Meetings• Visual Signals on Alarm Systems• Permanent Signage of Emergency Procedures• Closed-Captioning on Televisions	<ul style="list-style-type: none">• Bricks Under Desks• Inexpensive Ramps• Open Office Areas• Wide Hallways• Larger Bathroom Stalls• Easily Reachable Storage Areas• Clear Walkways and Paths• Reachable Water Fountains• Less weighted doors

To make accommodations for people with disabilities, you might need to include Assistive Technology Devices and Services in your plans.

- **Assistive Technology Devices:** Any product or piece of equipment used to maintain or improve the functional capabilities of people with disabilities.
- **Assistive Technology Services:** Any service that helps an individual select, purchase or use an assistive technology device, including: evaluation, funding, design, customization, adaptation, maintenance or repair of assistive technology devices, or therapy, training or technical assistance involving assistive technology devices in home, school or work environments. These services are available to persons of all ages: infants to older adults.

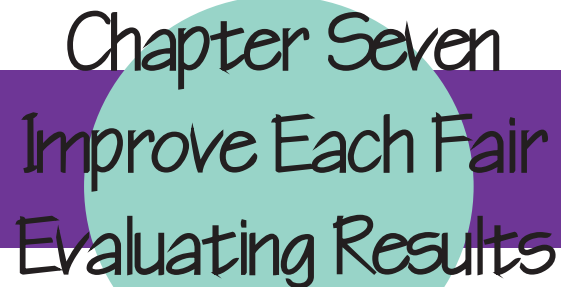

For additional information, contact one of the following for assistance:

- Oklahoma ABLE Tech – okabletech.okstate.edu
- Oklahoma Department of Rehabilitation Services –
- Oklahoma Equipment Connection (OEC) – okabletech.okstate.edu/resale
- Ability Resources, Inc. – 918/592-1235 or 800/722-0886
- Job Accommodation Network (JAN)* – www.jan.wvu.edu
- National Support Center for Persons with Disabilities

** The Job Accommodation Network (JAN) is an international toll-free consulting service that provides information about job accommodations and the employability of people with functional limitations.*

Anyone can call JAN for information regarding the hiring, retraining, retention or advancement of persons with disabilities.

Chapter Seven

Improve Each Fair Evaluating Results

A word from Dr. Judy Berry

Professor of Psychology at the University of Tulsa

Attention to and evaluation of accessibility elements is the critical underpinning of success, because this encourages a high level of participation. All the planning required and money spent doesn't mean much if the people who should be there can't get in or use the event.

Improve Each Fair

How to evaluate results

Was your job fair a success? It's not difficult to figure out. Your goal should be to have at least 20 percent of the job fair attendees be people with disabilities. A sample evaluation form can be found in the resource guide at the back of this manual. To determine whether you've met your goal, you should:

- Take an informal poll of booth workers and volunteers to determine the approximate number of attendees with disabilities.
- Create a brief 10 question evaluation/participation form and have each participant return the form as he or she leaves the fair.
- Ask an Alliance or other volunteer member to be an evaluator throughout the entire job fair planning and implementation process. They can inform you on the effectiveness of your event from their expertise and experience.

Did You Know?

Actual costs of job accommodations for workers with disabilities are:

- \$0 - \$500 = 68 %
- \$501 - \$5,000 = 27%
- \$5,001 or more = 5%

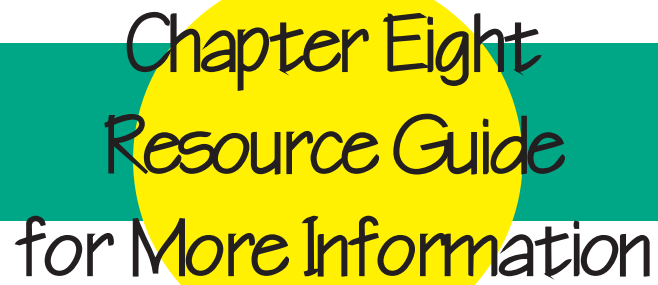

What can you do if your participation goal wasn't met? Use the information and feedback you receive to determine areas that need improvement and those that participants liked.

Questions you might ask include:

- Did participants have difficulty getting to or around the job fair?
- Did marketing materials clearly indicate the job fair was accessible to those people with disabilities?
- How did he or she hear about the job fair?
- What are some suggestions to how you can improve the job fair?
- What were some of the best aspects for participants?

Tallying the results of these questions will be simple, and you can keep track of responses to gauge what needs to be changed.

Best of luck with your job fair!

Chapter Eight Resource Guide for More Information

Companies saved money by accommodating employees with disabilities.

- 38 percent saved \$1 - \$5,000
- 34 percent saved \$5,001 - \$20,000
- 23 percent saved \$20,000 - \$200,000
