

June 2016

Optimizing the health and well-being of women, infants, children and families through broad-based community engagement and advocacy within a local system of health education, prevention services and community support to eliminate health disparities.

Welcome to The Family Health Coalition Newsletter. The Family Health Coalition focuses its efforts on four areas: prevention, health & wellness, early development, and medical neighborhood development. Check out the robust calendar of events for June and the multiple continuing education opportunities being offered electronically.

If you would like to include your event in the monthly calendar of events, please contact Laura Ross-White at lrw@csctulsa.org

Funding Opportunities

Personal Responsibility Education Program Innovative Strategies

Deadline: June 27, 2016

The Youth Services Bureau of the U.S. Administration for Children and Families will accept applications from local organizations and entities to develop, implement and test innovative adolescent pregnancy prevention strategies for the Personal Responsibility Education Program Innovative Strategies. This program provides services to high-risk, vulnerable and culturally underrepresented youth populations. This includes youth in foster care, homeless youth, youth with HIV/AIDS, pregnant and parenting women who are under 21 years of age and their partners, youth who have been trafficked and youth residing in high teen birth rate areas. Projects are required to implement at least three of six adulthood preparation subjects: healthy relationships, adolescent development, financial literacy, parent-child communication, educational and career success, and healthy life skills.

For more information [click here](#).

Healthy Tomorrows Partnership for Children Program (HTPCP)

Deadline: August 2, 2016

The purpose of this program is to promote access to health care for children, youth and their families nationwide, and employ preventive health strategies through innovative community-based programs. This program supports HRSA's goals to improve access to quality health care and services, to build healthy communities, and to improve health equity. HTPCP funding supports projects that provide clinical or public health services, not research projects. HTPCP applications MUST represent either a new initiative (i.e., project that was not previously in existence) within the community or an innovative new component that builds upon an existing community-based program or initiative.
