

UNDERSTANDING COORDINATED REFERRAL NETWORKS

WHAT WE DO

Each day, thousands of Oklahoma veterans look for help, but don't know where to turn. Oklahoma Veteran Connections is a 360-degree coordinated referral network built on trust and powered by a shared technology tool that aligns veteran service providers and equips them to confidently create and receive referrals which results in more efficient delivery of services to our community's veterans.

We use best-in-class technology to quickly connect veterans to the services and resources they need. Partner providers can track and measure outcomes on a consistent, real-time basis, while funders can clearly see their dollars at work in the community.

HOW DOES IT WORK?

A coordinated referral network acts as a hub for veteran service providers that operates collaboratively to provide delivery of services to veterans in an expedited and coordinated system. This is accomplished through:

	Unifying data and enhancing communication between partner providers so referrals can be made with confidence
	Tracking all referrals and 100% of outcomes across provider agencies using real-time data
	Giving partner providers the tools and ongoing support they need to best serve veterans
	Building robust databases within the network of community resources and veterans information
	Allowing potential clients to seek help in the method of their choice (by phone, in person, online, etc.)

360 DEGREES OF SUPPORT
