

LET'S GET BACK TO what we miss the most.

COVID-19 has changed how we live and how we feel. But now, vaccines are becoming available. And they are the first step that lets us get back to what we miss most.

Things you need to know about **COVID-19 vaccines.**

- 1 You will not catch COVID-19 from COVID-19 vaccines.
- 2 Researchers made sure that the trials included adults of diverse backgrounds, races, ethnicities, and geographic areas.
- 3 People with underlying medical conditions can receive FDA-authorized COVID-19 vaccines as long as they have not had an immediate or severe allergic reaction to a COVID-19 vaccine or to any of the ingredients in the vaccines. Vaccination is an important consideration for adults of any age with certain underlying medical conditions because they are at risk for severe illness from COVID-19.
- 4 We should continue wearing masks, staying 6 feet apart from people we don't live with, avoiding crowds, and washing our hands.
- 5 Getting immunized against COVID-19 will keep most people from getting sick. Even in a rare case where one does catch the virus, the vaccine will likely prevent you from becoming seriously ill.
